NANO·MICRO BUBBLES
5 times normal oxygen

*No chemical substances or alcohol are used.

This SORA spray is a mineral-rich natural water of Hokkaido that contains nano-sized reduced oxygen (containing 5 times the normal amount).

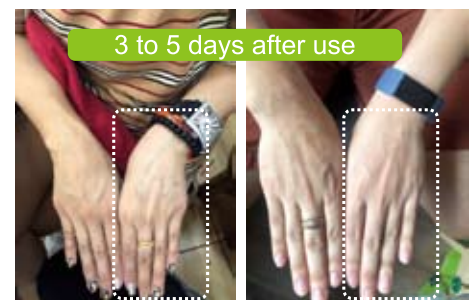

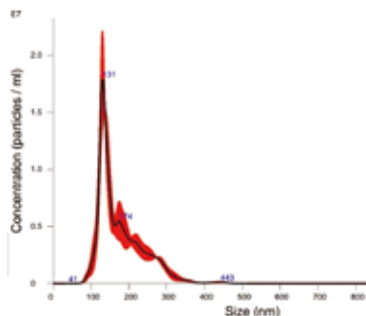

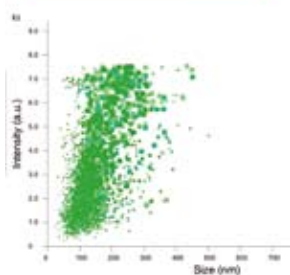

I dissolved it. This allows oxygen to permeate the skin quickly, eliminating dark spots, dark spots, dead skin cells and reducing wrinkles. Rejuvenates the skin and rejuvenates new and healthy skin!

80-100nm nano-sized oxygen
Contains about 80%!

NANOSIGHT

Rachamangala Institute of Technology in Thailand succeeded in developing an ultra-high performance nano bubble generator in collaboration with Kyoto University in Japan. In a typical nano bubble generator, dissolved nano-sized oxygen is around 10-15%. Most of the rest are micro size. Oxygen water created by this device contains nano-sized oxygen with a very small size of 80 to 100 nm dissolved in nearly 80%.
