Are you concerned
about seasonal changes
and sudden health risks

Are you concerned
about your health or
belly fat

Do you want to enjoy
your meals every day

日本製
MADE IN JAPAN

Contents: 350mg x 30 tablets

Cutting edge liposome technology

Liposomes are nano-sized artificial membranes with a phospholipid bilayer structure replicating the human cell membrane. Encapsulating nutrients within liposomes prevents them from being broken down under harsh conditions such as stomach acid and increases their absorption in the intestinal tract.

QUERCETIN

Quercetin is a type of polyphenol found in large amounts in onion skins. It can remove excess active oxygen from the body. Therefore, it effectively prevents arteriosclerosis and myocardial infarction, which are believed to be caused by oxidative stress caused by active oxygen.

CATECHIN EGCG

It contains the highest quality catechin EGCG, found in abundance in Sencha (Japanese green tea). EGCG blocks the action of lipase, which absorbs fat into the body, increasing fat oxidation and promoting body fat metabolism.

FLAXSEED OIL

Flaxseed oil, taken together with quercetin, supports absorption, and this product contains flaxseed oil that contains alpha-linolenic acid, a type of omega-3 essential fatty acid.
